

Chisel Form Diamond Dressers

Buy our products online at www.asahi-diamond.com.au

The shape of an Asahi Diamond Chisel Form Dresser changes depending on the machine and application.

These Dressers have a wedge shape so that the corner of the Diamond does not touch the grinding wheel.

The sharper point Diamonds provide better forming and usually have a radius of 0.2mm. The blade has a negative angle to increase strength.

Custom specifications are available upon request.
