

Multipoint Diamond Dressers

Buy our products online at www.asahi-diamond.com.au

Asahi Diamond Multipoint Dressers have several small Diamonds rigidly mounted in a pattern.

Longer tool life is obtained because several Diamond points are in contact with the wheel, reducing pressure on each point.

Multipoint Dressers are particularly suited for rough finishes used in conical grinding, inner-surface grinding, centre-less grinding. Finishing and dressing of convex surfaces and the side of grinding wheels.
